

## NAG C Library Function Document

### nag\_moment\_1\_landau (g01ptc)

#### 1 Purpose

nag\_moment\_1\_landau (g01ptc) returns the value of the first moment  $\Phi_1(x)$  of the Landau density function.

#### 2 Specification

double nag\_moment\_1\_landau (double x)

#### 3 Description

nag\_moment\_1\_landau (g01ptc) evaluates an approximation to the first moment  $\Phi_1(x)$  of the Landau density function given by

$$\Phi_1(x) = \frac{1}{\Phi(x)} \int_{-\infty}^x \lambda \phi(\lambda) d\lambda,$$

where  $\phi(\lambda)$  is described in nag\_prob\_density\_landau (g01mtc), using piecewise approximation by rational functions. Further details can be found in Kölbig and Schorr (1984).

To obtain the value of  $\Phi_2(x)$ , nag\_moment\_2\_landau (g01qtc) can be used.

#### 4 References

Kölbig K S and Schorr B (1984) A program package for the Landau distribution *Comp. Phys. Comm.* **31** 97–111

#### 5 Parameters

1: x – double

*Input*

*On entry:* the argument  $x$  of the function.

#### 6 Error Indicators and Warnings

None.

#### 7 Accuracy

At least 7 significant digits are usually correct, but occasionally only 6. Such accuracy is normally considered to be adequate for applications in experimental physics.

#### 8 Further Comments

None.

#### 9 Example

The example program evaluates  $\Phi_1(x)$  at  $x = 0.5$ , and prints the results.

## 9.1 Program Text

```
/* nag_moment_1_landau (g01ptc) Example Program.
