

# Thanasimus (Coleoptera: Cleridae) of Germany:

## Identification key for imagines

This identification key can be used to identify imagines of both sexes. It is valid only for specimens from Germany. It accounts for normal individual variation, but cannot be used to identify aberrant or damaged specimens.

- 1a** Underside of the three thoracic segments either all red or all black.....**Thanasimus femoralis**
- 1b** Underside of the prothoracic segment red, underside of meso- and metathorax black.....**Thanasimus formicarius**
