Reading the Past: the History of Written English

MLI325

This module covers the history of the English language from the beginnings to the present day. It combines the study of language history with a specific focus on the written evidence, and on the social context of language change. We look at what texts were like in the past, who produced and read them, and how changes in language and literacy interact with social and technological change. We also address the question of present-day uses of the past: how much can we know about past languages, and how can we apply and communicate the findings of historical research? At the same time, the course provides a solid, practical introduction to earlier stages of English and addresses the major linguistic developments from Old to Present-Day English.
